

UPDATED INFORMATIVE DIGEST

The Department of Water Resources has changed the Aggregated Farm-gate Reporting Form title from “Format” to “Form” for better clarity, indicating this as a form to be completed by agricultural water suppliers.

The subtitle was also change for clarity from “Due annually beginning no later than July 31, 2013 from agricultural water suppliers subject to Title 23, Division 2, Chapter 5.1, Article 2 of the CCR – Agricultural Water measurement” to “Title 23, Division 2, Chapter 5.1, Article 2 of the CCR requires water supplier subject to the regulation to report to DWR the previous calendar year’s aggregated farm gate delivery by July 31 of the subsequent year.” DWR believes this makes it more clear that the calendar year data is due the following July 31 each year.

Under Section 1, DWR added “Irrigated Acreage for Reporting Period” to the left side of the form in response to a public comment. DWR added “Total” to “Service Area Acreage in response to the same public comment. This clarifies that irrigated acres is to be reported separate from total service area acreage.

Under Section 2, DWR added “Reporting Year” to the right side of the form in response to a public comment. This clarifies for which year a water supplier is reporting its data. For example, some water suppliers may be a few years behind in reporting data, and therefore this allows them to submit previous calendar year data.

Section 3 remains unchanged from the 45-day notice.

At the bottom right of the form, the revision date of the form was changed from 6-20-2012 to 8-28-2013.
